

AYUSH AGARWAL

Vellore Institute of Technology

📞 7888738163 ✉ ayush.agarwal2022a@vit.student.ac.in 🌐 www.linkedin.com/in/ayush-agarwal-09ayu

Education

- | | | |
|--|--|--|
| • Vellore Institute of Technology
B.Tech in Computer Science
Engineering Specialization in Data Science | Sep 2022 – Present
Vellore, Tamil Nadu | CGPA
8.99 (till 7 th Sem) |
| • Intermediate Class 12 th | July 2020 – July 2022
Stepping Stones, Chandigarh | 77% |
| • Class 10 th | 2020
The Gurukul, Panchkula, Haryana | 89% |

Experience (Internship)

- | | |
|---|---|
| Panacea Infosec PVT LTD
IT Intern | June 2024 – July 2024
Noida, UP |
|---|---|
- **PCI DSS Knowledge:** Understand standards and requirements.
 - **Compliance Support:** Assist with documentation, audits, risk assessments, and scans.
 - **Risk Assessment:** Identify and evaluate payment data security risks.
- Technical Skills:-** **Network Security:** Firewalls and segmentation, **Encryption:** Secure data in transit and storage, **Compliance & Auditing:** Monitor activity and automate checks.

Projects

- | | |
|--|-----------------|
| Toxic Comment Classifier Chat Forum Flask, TensorFlow, Keras, LSTM, GloVe, PyMongo, MongoDB | Mar 2025 |
|--|-----------------|
- Developed a deep learning-based toxic comment classifier using LSTM and GloVe embeddings, integrated into a Flask powered Q&A forum.
 - Automatically detects and blocks toxic questions or replies in real-time, showing user warnings before submission.
 - Designed and implemented a responsive chat interface and connected it to MongoDB using PyMongo.
- | | |
|--|-----------------|
| Autism Spectrum Disorder (ASD) Prediction Model Python, Scikit-learn, ML, Streamlit | Sep 2024 |
|--|-----------------|
- Developed ML model to predict Autism Spectrum Disorder from behavioral and demographic data.
 - Preprocessed data (normalization, encoding, outlier handling) and applied supervised algorithms (Logistic Regression, SVM, Decision Trees), evaluating with accuracy, ROC-AUC, and F1-score.
- | | |
|--|-----------------|
| Integrated Algorithmic Trading Framework Backtrader + Binance | Jan 2026 |
|--|-----------------|
- Developed an end-to-end algorithmic trading framework integrating Backtrader with Binance API for seamless backtesting and live/paper trading.
 - Implemented and compared Simple Linear, AR(3), and PyTorch-based Neural Network models; AR(3) achieved best performance with Sharpe Ratio 2.28.
 - Built a complete trading pipeline including OHLC data processing, SMA/EMA/RSI feature engineering, automated signal generation, and realistic cost-adjusted evaluation (78.98% gross return under 3x leverage).

Certifications

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- Machine Learning, Data Science and Generative AI with Python
- Deep Learning 2025: Neural Networks & AI
- AI Automation in n8n: Build Agents & Voice Agents
- AI Engineer Agentic Track: The Complete Agent & MCP Course

Technical Skills

Languages: C++, Python, C, HTML/CSS, JavaScript, SQL, R

Technologies: Jupyter, MS Visual Studio, R Studio, Office 365 Tools, GitHub

Interpersonal: Communication, Problem-Solving, Networking, Analytical Skills, Strategic Thinking, Teamwork

Course work: Operating System, Computer Networks, Database Management System, Machine Learning

Solved 700+ DSA problems on LeetCode, demonstrating strong problem-solving, algorithmic thinking, and optimization skills.
